

## Scope of Service

### Mission Essential CTS Phish Assessment

Mission Essential CTS will perform a phishing assessment of your environment and employees by utilizing the Phish Threat service on a trial basis. This Assessment will send look-a-like emails to employees to determine if a phishing attack would be successful in your environment.

### Technology

Mission Essential CTS Phish Threat service will be used to distribute emails to your employees which look like real emails from common entities including but not limited to Facebook, Netflix, AEP, Twitter, YouTube, and AT&T.

### Deliverables

- **Phishing Report:** Mission Essential CTS will present a report after 3 campaigns related to Phishing attempts and results. The phishing report will detail email addresses which may be compromised due to how those individuals performed in the assessment.

### Customer Requirements

- **Email List:** Provide Mission Essential CTS with an Email list and approve Mission Essential CTS to send fake Phishing Emails to employees with Domain email addresses.
- Client must work with Mission Essential CTS to enable emails past spam filters

### Limits and Liabilities

Customer cannot already be on the SOPHOS platform either with Mission Essential CTS or another vendor. Signing up for the Phishing Assessment will prevent the customer from any 30-day trial subscriptions which might otherwise be offered to new customers for Onyx360<sup>SM</sup>. By agreeing to this Statement of Work you also agree to Mission Essential CTS Terms and Conditions stated below.
